Project Atlas Launch Plan. Atlas is an autonomous warehouse picking robot designed for mid-sized distribution centers. After two pilot phases, Atlas is scheduled to reach general availability on March 9, 2027.

Pricing. Atlas Standard is priced at 38,500 dollars per unit. Atlas Pro is priced at 52,000 dollars per unit and includes the vision upgrade and priority support. Volume discounts start at ten units.

Risks. The main supply chain risk is the lidar sensor, which is sourced from a single vendor, Kestrel Optics, with a lead time of 14 weeks. A second supplier is being qualified for the second half of 2027.

Pilot program. The pilot customers are Harbor Freight Logistics in Memphis and Blue Ridge Grocers in Asheville. Each pilot runs for twelve weeks with weekly performance reviews.
